Hi all, in Bahrain can anyone recommend a good TV streaming service /firestick service? My primary focus is UK football access. I have had streaming system before and had constant issues with freezing etc so ended up purchasing a Bein system. The Bein being cable / dish for installation and use is posing me issues when trying to get installed in a new property.
Paul.

Hello Paul,

Have you managed to find a way to watch your football matches since then?

You may also want to check with local providers, as some offer flexible installation options or internet-based streaming packages instead of dish-only solutions. It could be worth exploring.

We would be happy to hear back from you and know how things are going. 😊

All the best,

Cheryl

@pauldg

If your Firestick keeps freezing mid-match or mid-movie, a lot of what people chase on those boxes is actually free-to-air or official uploads — Indian, Pakistani, Filipino, Arabic channels that already broadcast legally. I built [link under review] to put 600+ of those live channels (plus 16,000+ movies & shows) in one place, no signup, no pirate streams. (I built this — declared interest.) Honest gap: live EPL/cricket still needs TOD or beIN — no free service can carry that legally, and we don't pretend to.
